CO₂ neutral multi energy grid in Green Energy Park in Zellik

29 oktober 2019

Within the EU Interreg Northern Connections project, Blue Gate Antwerp and Green Energy Parc would like to invite companies – especially small and medium sized businesses – to present their innovative ideas regarding smart mobility solutions and solutions for multi energy grids respectively.

The key focus of this matchmaking event is centred around the Living Labs concept. For this event, two Living Labs with multiple innovation challenges present themselves:

- Living Lab - Smart Mobility Hub: how to connect Blue Gate Antwerp with the CityBlue Gate Antwerp: Blue Gate Antwerp (BGA) is the climate neutral business park reserved for innovative companies with a well-defined ambition: linear growth through circular operations. This business site will be equipped with a fossil free mobility hub.
- Living Lab - CO₂ neutral multi energy grid in Green Energy Park in Zellik: Green Energy Park (GEP) is a centre of expertise in sustainable energy systems, mobility, smart regions and healthcare technology. An on-site green datacentre offers sufficient capacity to support calculations by research institutes and companies.

Participate to get in direct contact with the project developers of both Living Labs and pitch your innovative solutions during the workshops or in one-on-one B2B meetings.

The matchmaking events offers you:

- The opportunity to initiate new partnerships with international companies, research institutions and governmental authorities
- The opportunity to partake in the session 'Living the Change' and networking opportunities during G-STIC 2019
